

### Marquees

- Choose from a large range of pre-entered marquees from a wide range of manufacturers - Frame, Traditional, Tubular marquees, Canopies.
- Add your own frame marquee sizes quickly and easily by entering:- width and bay size. eave and apex height, no of purlins, position/height of gable legs.
- For traditional marquees enter:- width, start and middle sizes, king pole/queen pole information, side pole height and spacing.
- You can also configure small, tubular marquees to suit your requirements.
- Add several marquees to one drawing for catering, toilets, reception, etc.
- Remove internal walls.
- Create screens.

### Room/Exhibition Stand/Event

- Create a single room, marquee, exhibition stand or an entire event.

### Doors, Windows, etc

- Standard 3m and 5m doors included.
- Add additional types of doors as per your own stock.
- Glass fully transparent so you can see out/in through it.

### Interior

- Show or hide linings.
- Alter them to be window drapes.
- Set the size, type and colour of swags / pelmets.
- Choose your floor covering and colour.

### Chairs and Tables

- Add round tables with chairs either singularly or a group.
- Put them in straight lines or staggered.
- Delete individually, all items or just those selected.
- Create theatre style rows of chairs.
- Set the distance between chairs sideways & between rows
- Move entire blocks together.

### Dance Floors/Stages

- Add a dance floor of any size (metric or imperial).
- Apply a material to it-wooden/black/white/metal.
- Stages can be any size, covered in any material and have a valance if required.

### Create Groups of Objects

- Once you have dropped individual objects onto your drawing, you can save them as a group for later use.
- If you use a trestle table with six chairs you can highlight the individual items and then store them as an individual object so that next time you only have to add one item.
- This could also work for things like a top table with eight chairs, oval table with chairs or maybe a set of steps.

### Printing

- Print a 2D Layout. Print a 3D Layout from any angle. or a combination of 2D & 3D on the same page.
- Customise the template to have your company name, the customer's name, date, venue, on each printout.

### Saving

- Save as a jpg to email to your customers.
- Save to internal gallery to use when printing a combined layout.
- Use saved images from internal gallery in other jobs.

### Background Picture

- Insert a background picture to your drawing.

### Views

- View your finished 3D drawing from any angle, eg:- above, from the side, looking at the interior. outside looking in through the door/windows, inside looking out at a view or from the side.

### Layout Templates

- Create a standard layout for a particular size tent and store it.
- Copy this into a new job.
- Exchange the chairs for a different type / colour.
- Alter your colour scheme.
- Add a catering tent if required.
- Tweak the details of the layout and you will then have a new job created in a couple of minutes.

### Materials & Objects

- A selection of materials and objects available.
- Import pictures or photos to create new materials.
- Use actual photos of walls, doors, windows, etc. to give a lifelike texture.
